

Composite estimate figures

Species count , stability measures

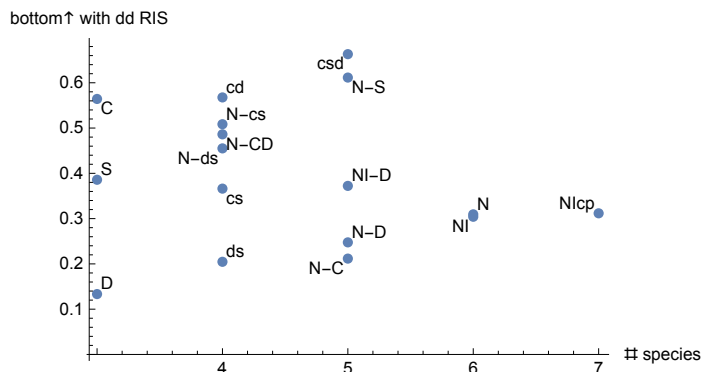

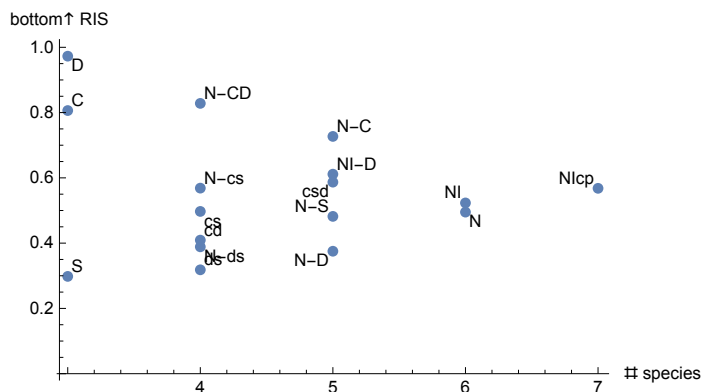

Species count , top down relative interaction strength measures

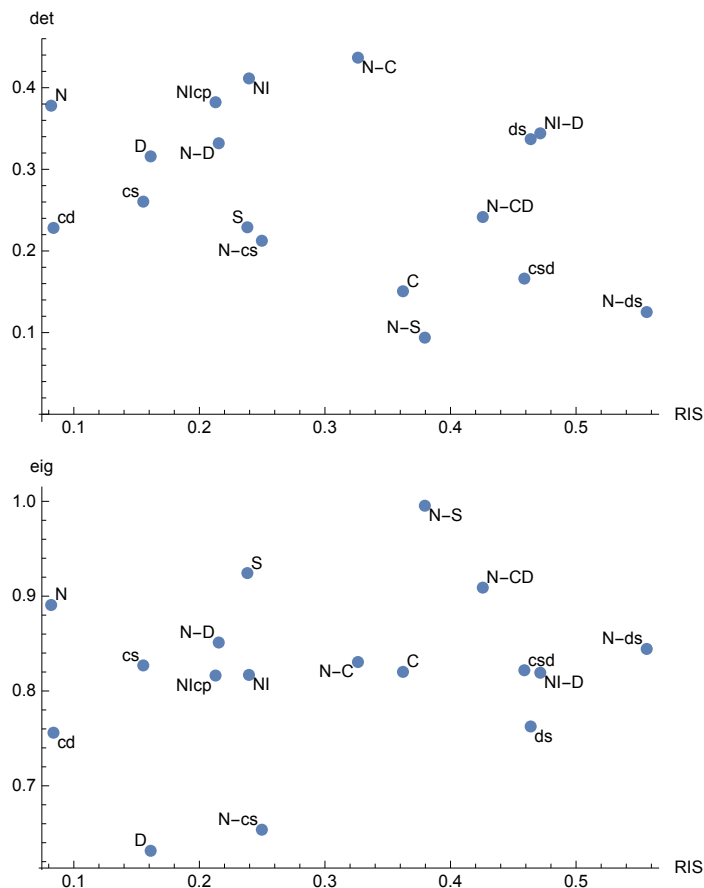

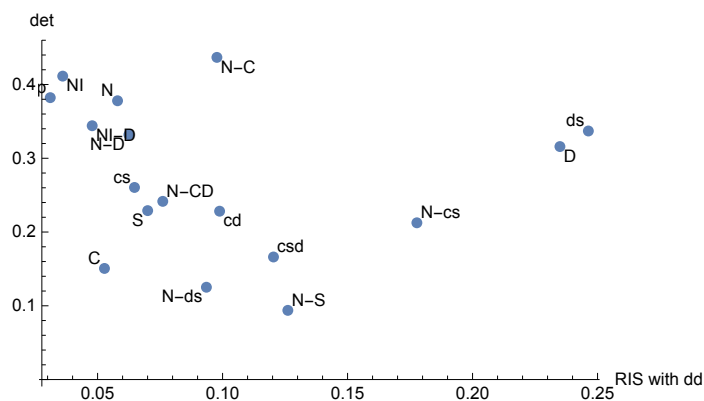

Species count , bottom up relative interaction strength measures

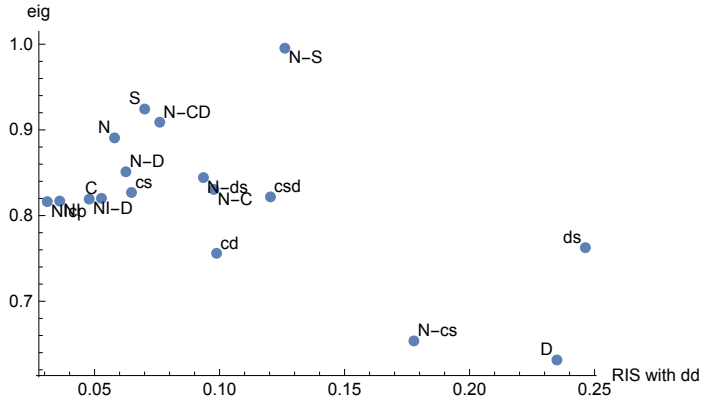

top down realtive interaction strength , stability measures

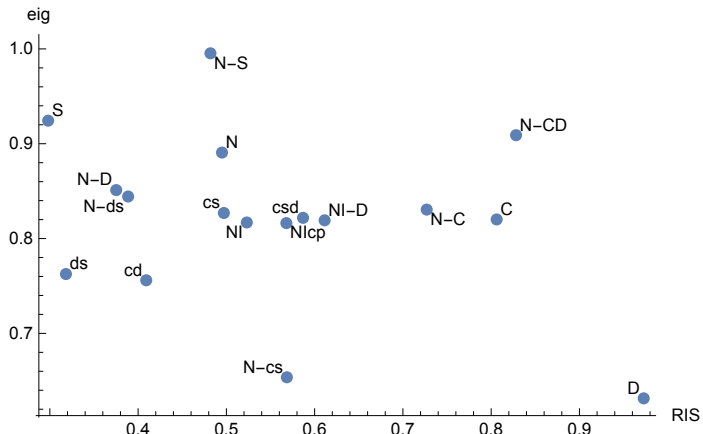

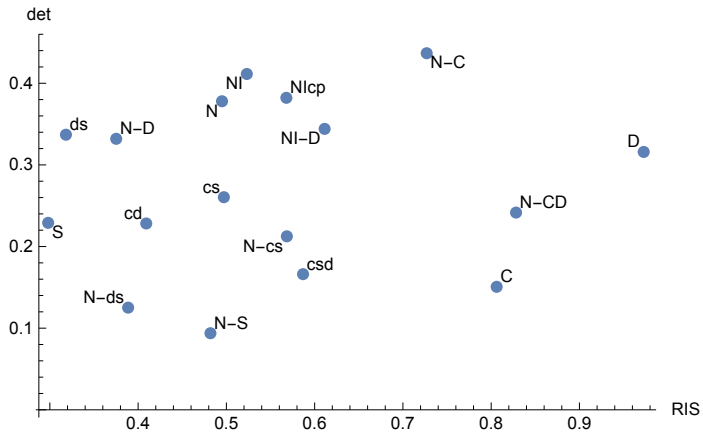

Top down realtive interaction strength with density dependence , stability measures

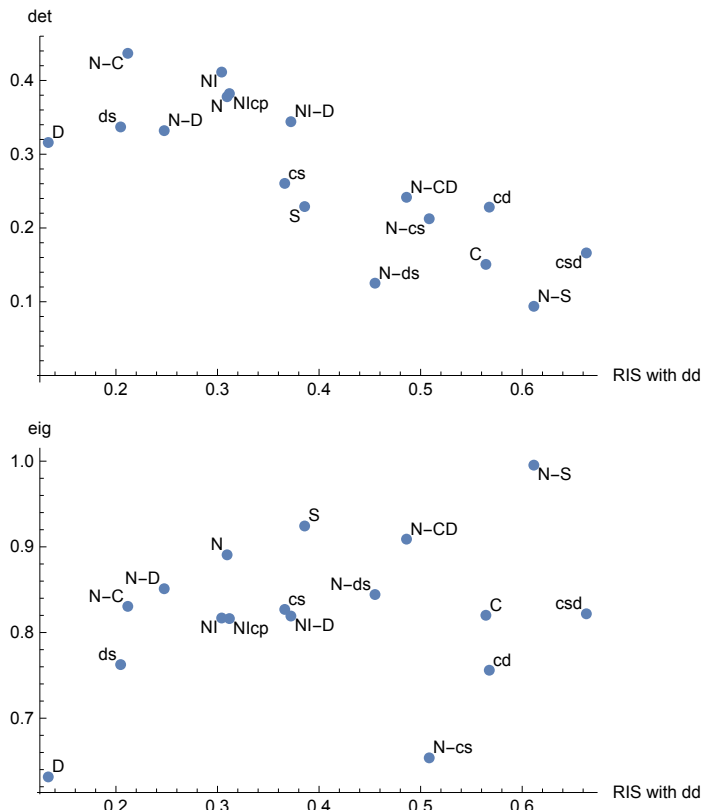

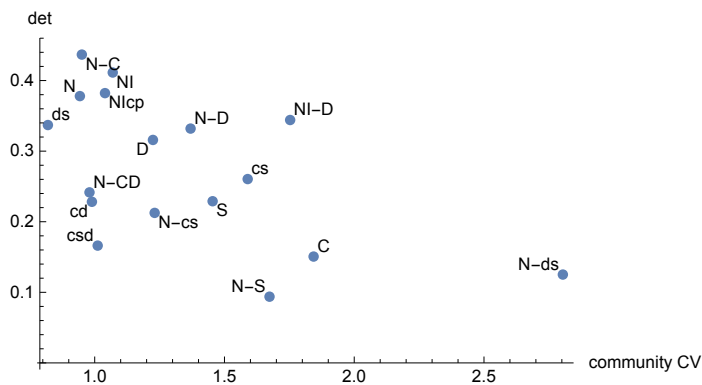

Bottom up relative interaction strength , stability measures

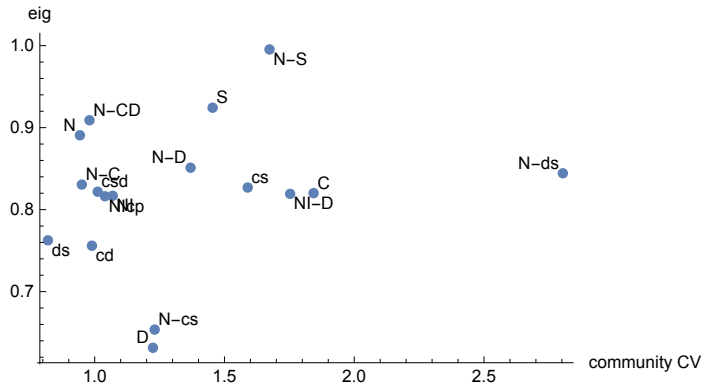

bottom up reative interaction strenth with density dependence , stability measures

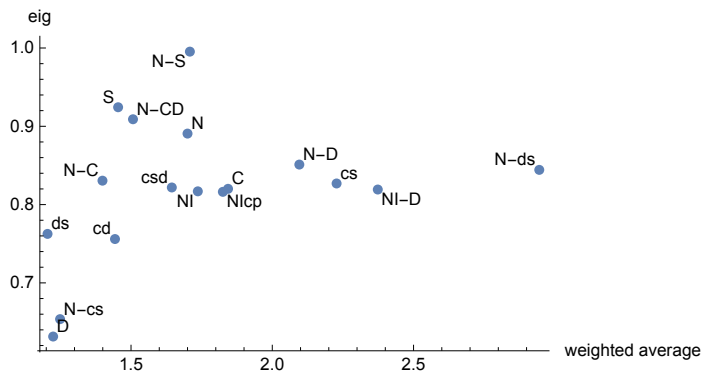

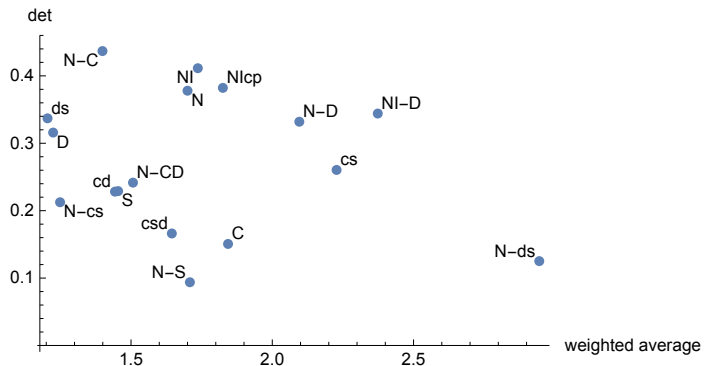

Community CV , stability measures

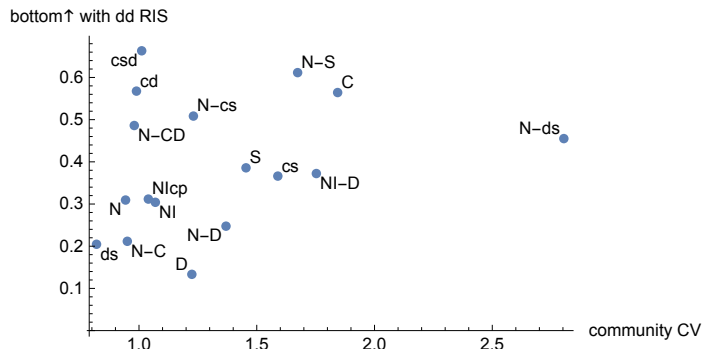

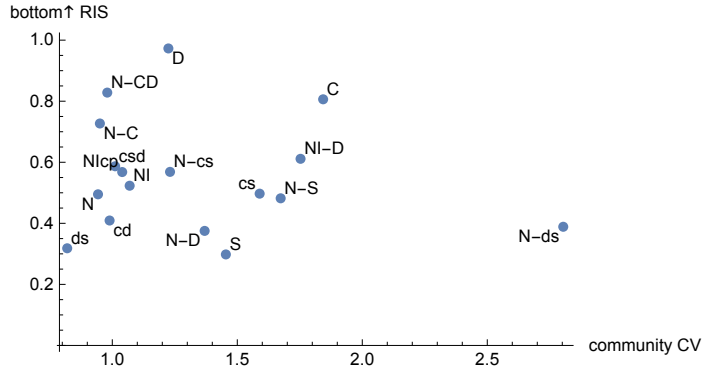

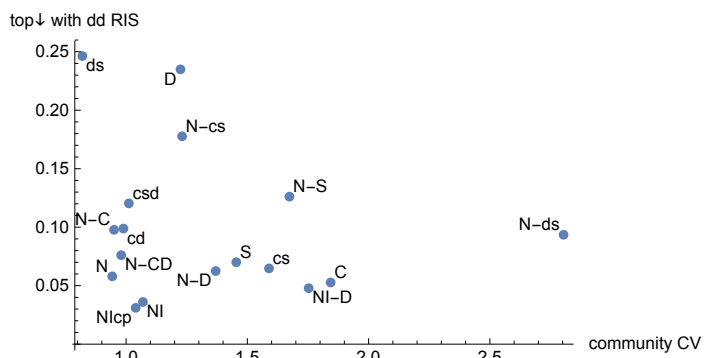

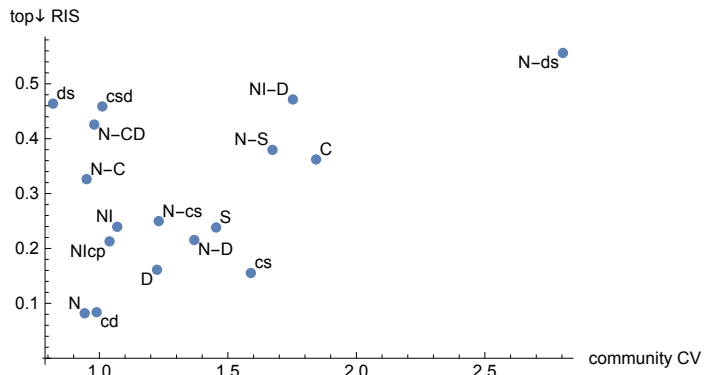

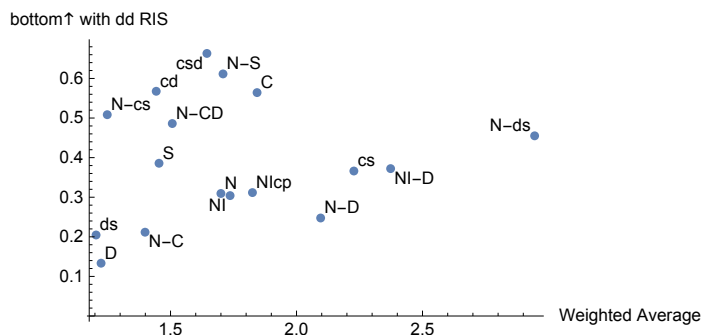

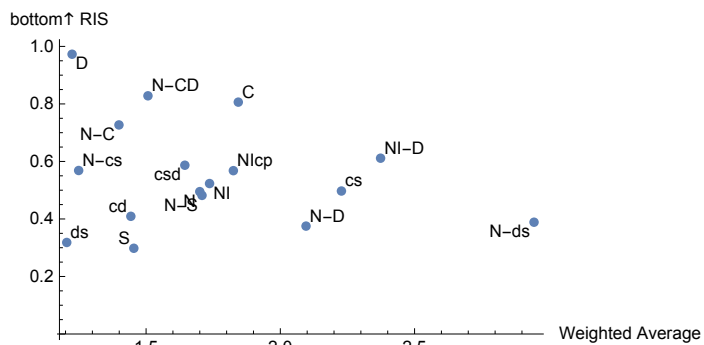

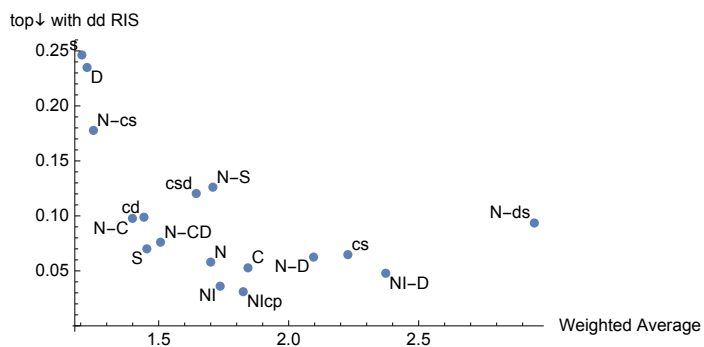

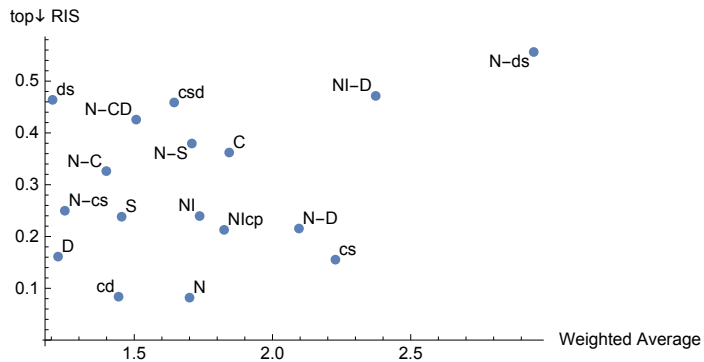

Population CV (weighted average) , stability measures

Community CV , relative interaction strength measures

Weighted Average , relative interaction strength measures

Species count , stability measures (composite and individual tanks)
